

AJ Touré

Front End Developer & Creative

projects

airhead

A meditation app

React/Firebase/HTML5/CSS3

Created at Juno College,
2021

This app prompts the user to time their meditation. Our firebase returns a quote to think on, along with an animated focal point that continues until the time runs out.

Poll it Together

a DIY polling app

React/React Router/Firebase/HTML5/CSS3

Created at Juno College,
2020

An application that allows the user to create a poll, which keeps track of it's statistics using firebase!

experience

Pre-Production Builder

Gabriel-Scott Lighting,
2019-2020

- Successfully wired and assembled lamps using complex design paths, for high ranking clients including Chanel, Drake, Kylie Jenner
- Completed an average of two builds a day, consistently ahead of deadline by an average of 2-5 days

Assistance Coordinator

Axa Assistance Inc.,
2017-2019

- Managed hundreds of active cases simultaneously while connecting clients with medical care and acting as liaison for their insurance providers
- Coordinated emergency evacuations while fielding urgent calls, successfully resourced health care and emergency transport services across an international network

Hi, I'm AJ!

A former fine arts student and alumni of Juno College - I create beautiful & responsive environments and interactions. A common assumption is that tech and nature are opposites. I think they're mirrors.

I'm excited about finding all the ways that tech can help us create a more beautiful, equitable, and accessible world!
